Comfortable : Material UI, Shadcn-UI, Typescript, Node.js, Express.js, MongoDB, Axios

Familiar : C, OOP(C++)

Tools : Git, Github, Vite, NPM, VS Code, Chrome Dev tool, Vercel

Project (open source contribution)

AssetPulse | [Visit site](#) | [Client-code](#) | [Server-code](#)

AssetPulse website is developed for managing assets of a company. A company and employees of the company can manage their assets very simply.

- Authenticated users(employee/ Hr) can view the asset list if he has added, removed or updated.
- Hr can add assets to the list and remove them from the list.
- Employees can request for the assets.

Technology: Tailwind css, Shadcn-UI, React, Typescript, Firebase, Axios, Node.js, Express.js, MongoDB.

BareBlog: (Full Stack-MERN) | [Visit-site](#) | [Client-code](#) | [Server-code](#)

BareBlog website is a tech related blogging site. A blogger can create his blog and can publish here.

- Only authenticated users can create blogs.
- Users can only read and comment on blogs and can't delete or update.
- Any user can add his favorite blog to the wish list.

Technology: Tailwind css, Firebase, Material UI, React, Typescript, Node.js, Express.js, MongoDB

To-do Field: (Full Stack-MERN) | [Visit-site](#) | [Client-code](#) | [Server-code](#)

To-do-Field website is built for managing tasks. User can manage his task by using a drag-and-drop system.

- Only authenticated users can access the feature.
- Users can add, update and delete their tasks.

Technology: React, JavaScript, Node.js, Express.js, MongoDB, Tailwind css, Firebase Authentication.

Education

❖ **National University of Bangladesh**
